ADSL Virtual Private Network

Product Information

Vox Datapro's ADSL Virtual Private Network solution is a managed VPN over ADSL with the benefit of enhanced secure access from your remote branches to your head office. Through the use of IPSEC, a secure VPN tunnel is established over cost-effective ADSL. The solution is implemented, managed and supported by Vox Datapro, enabling your business to benefit from improved access to information without concern for the technical infrastructure.

Features

- ADSL VPN firewall router rental
- Shaped, unshaped and local bandwidth options available
- Usage statistics provided
- Maintenance and support
- 24/7 remote VPN/firewall management

Benefits

- A fully outsourced solution means that your VPN is managed by Vox Datapro's highly trained and experienced network engineers, so you don't need to employ specialist IT staff
- Provides flexibility, since all Vox Datapro VPN solutions are fully scalable to expand as your business grows
- All Vox Datapro ADSL VPNs can be fully integrated into larger Vox Datapro MPLS environments
- State-of-the-art security provides protection against threats such as Denial of Service attacks
- Seamless integration of additional value-added IP services including intranets, extranets, multimedia, voice and network commerce
- Router and firewall rental minimises your investment spend in rapidly changing technologies, while freeing up capital to invest in your core business activities.

IPSEC/LZTP

- Fishbone™
- Eyeris™
- Legogo™
- Cristal Vox™

Options

Platinum (Unshaped)

Telkom does not apply port shaping restrictions, so this solution is shared with fewer people, enabling faster download times.

Gold (Shaped)

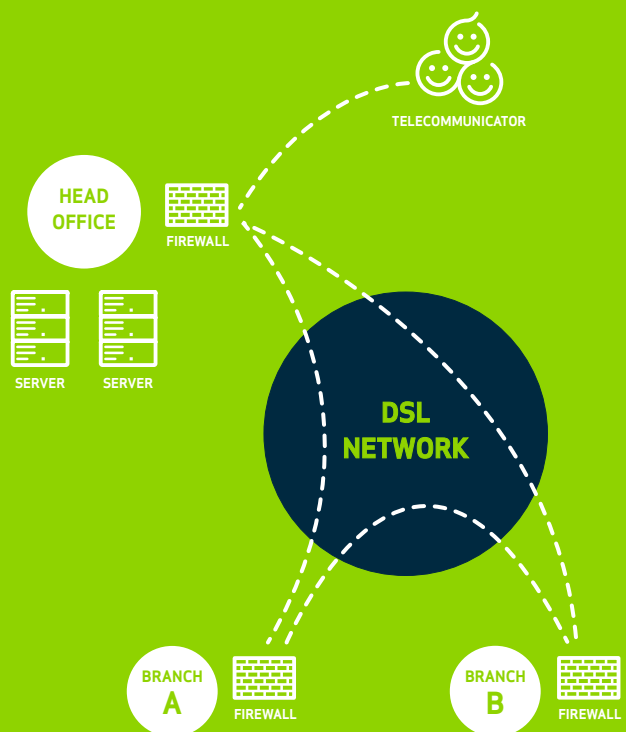

Telkom shapes the ports to throttle downloads, peer-to-peer traffic and other bandwidth-intensive applications which enables them to share the solution with more users.

Bronze (Local only traffic)

This solution excludes expensive international bandwidth. There are no port shaping restrictions, enabling faster download times. This solution is also shared with fewer people, ensuring faster browsing. Provides a more cost-effective solution for SMEs requiring little international bandwidth.

Additional Service Options

- Add web proxy to your ADSL VPN
- Router and firewall insurance
- Redundant links
