Practical telecoms

Vox Datapro (Pty) Ltd is a leading Telecommunication Service Provider focused on providing Internet connectivity and converged Internet Protocol (IP) services to business customers. Established in 1998, our practical connectivity solutions are designed around your specific business needs and priorities, helping to support your mission-critical communications.

Vox Datapro delivers all connectivity solutions via a world-class infrastructure. Our Service Level Agreements ensure peace-of-mind, while our 24-hour helpdesk fully supports and monitors services to ensure that no matter what size your business, you remain connected around the clock.

Be heard

Attix5 Backup Professional

Product Information

Attix5 Backup Professional provides automated online backup, off-site storage and rapid recovery of critical data for your entire operation, including server, desktop and notebook. More cost-effective than traditional tape backup infrastructure, Attix5 Backup Professional provides an enterprise-wide backup and retrieval solution.

Features

- Uses technology that copies only the bytes that have changed in your files and databases, so your backup is always up to date while minimising both local and remote server bandwidth utilisation
- Uses industry standard encryption, ensuring that any sensitive data stored, transmitted or accessed online using Backup Professional is protected by 'bank-level plus' security
- Makes use of intelligent file selection, so important files are automatically protected
- Allows file inclusion or exclusion at administrator level to enforce company policy
- Has built-in version control, which allows documents to be restored to the state in which they were saved
- Supports multiple operating systems and applications, including VSS Database plug-in for VSS-enabled applications
- Email notification of backup results
- Supports Microsoft Volume Shadow Copy Services (VSS) and Outlook PST files
- Easy deployment and rollout possible via Active Directory

Benefits

- Is completely automatic, so staff don't need to remember to backup their data
- High level of security – all data transmitted and stored in industry-leading encrypted formats and there is firewall support for SOCKS5 and HTTP PROXY
- Reduces bandwidth utilisation by up to 98%
- Ensures instant file recovery and availability of data without having to search through tapes
- Allows remote searching for lost files months after they were deleted
- Through a remote storage facility, keeps backups offsite in case of disaster
- Includes a network activity monitor that allows remote users to back up automatically on connection
- Allows you to securely access files remotely using WebAccess from any internet browser

Compatibility

Server edition platform support

- Microsoft Windows 2000 Server and Microsoft 2003 & 2008 (incl. Small Business Server bundles)
- Mac OS X (from Tiger/10.4)
- Linux
