vox® **datapro**
Practical telecoms

Vox Datapro (Pty) Ltd is a leading Telecommunication Service Provider focused on providing Internet connectivity and converged Internet Protocol (IP) services to business customers. Established in 1998, our practical connectivity solutions are designed around your specific business needs and priorities, helping to support your mission-critical communications.

Vox Datapro delivers all connectivity solutions via a world-class infrastructure. Our Service Level Agreements ensure peace-of-mind, while our 24-hour helpdesk fully supports and monitors services to ensure that no matter what size your business, you remain connected around the clock.

Be heard

Server hosting

Product Information

Vox Datapro offers a robust and reliable hosting service backed by a level of service that supports critical applications to allow your business to take full advantage of the opportunities of the internet. Our range of reliable, cost-effective hosting packages is designed to meet your immediate requirements and is scalable so it continues to suit your needs as your business grows. All packages provide the option to rent a server with either Linux or Windows pre-installed, so you can choose an operating system that best suits your business.

Features

- Server rental (optional)
- Rack space/cabinet (half and full)
- Committed bandwidth – unlimited or piped (64k increments)
- Security behind firewalls (shared or dedicated)
- Dedicated IP addresses
- 1 x LAN connection per server
- 24/7 support desk

Additional optional services include:

- Back-up services
- Server monitoring and alerts
- Web statistics
- SSL certificates
- Firewalls

Benefits

- High-speed network – connects directly to our fibre backbone ensuring fast response times and quality of service
- 24/7 support
- Temperature control – air-conditioning systems regulate the temperature of the data centre, ensuring a stable environment ideally suited for optimal processor and switch equipment performance

- UPS power management – uninterrupted power supplies and a back-up generator support the external power feeds to the Vox Datapro data centre
- Fire protection – our data centre's equipment and support rooms are contained in fire-secure enclosures, protected by high-tech smoke detection and fire suppression systems
- All our services have an upgrade path and are market-driven, ensuring that they add immediate and measurable business benefits

Options

Server hosting – unlimited

Ideal for customers with a high demand for traffic and needing unlimited bandwidth. This option is best suited for servers that require fast, reliable internet access.

Server hosting - limited

For customers wanting dedicated servers hosted with a specific demand for bandwidth for traffic. With this solution customers can fix their costs and limit the amount of bandwidth to the server.

Server rental

Suited for customers who want a rented option for the server and the hosting. Vox Datapro can fix the costs by supplying dedicated piped bandwidth to the server.

Virtual server rental

Customers can create a virtual server within our Blade environment, scalable hardware that can grow as demand increases.

- No physical hardware to manage
- Dynamically upgrade your hardware as and when you need it
- Most OSs can be loaded
- Root access
